

Level 0 Practice Coding Exam

You are going to make a program that uses the Robot to draw a shape however many times the user enters.

1. Create a new class
2. Make the Robot draw a shape
3. Set the pen width to 10
4. Use an option dialog to ask the user what color they would like the the Robot to draw
5. Ask the user how many shapes they would like to draw
6. Using a nested for loop, draw the shape however many time the user entered.
7. Move the Robot after you draw each shape so that they don't overlap.
